SAMPLE CITY HOSPITAL
DISCHARGE SUMMARY
Patient: Asha Mockerjee Age/Sex: 51/F ID: SYN-IP-04666
Admitted: 16 Jun 2025 Discharged: 23 Jun 2025
Consultant: Dr. R. Demo

Diagnosis: Acute coronary syndrome treated with angioplasty and stent

Hospital course:
Asha Mockerjee, a 51-year-old woman, was admitted with chest pain. ECG and blood tests were done, and an angiogram showed a blocked artery. A stent was placed and the patient remained stable and pain-free afterwards.

Discharge medications:
1. Tab Disprin 75 mg - 1 tablet once daily after meals
2. Tab Clopidogrel 75 mg - 1 tablet once daily. Do not stop without asking your cardiologist.
3. Tab Lipitor (Atorvastatin) 40 mg - 1 tablet at bedtime
4. Tab Metoprolol succinate 25 mg - 1 tablet once daily
5. Tab Ramipril 2.5 mg - 1 tablet once daily
6. Tab Pantoprazole (Pantop) 40 mg - 1 tablet once daily before meals

Follow-up:
- Please review at the cardiology OPD after 14 days with a repeat ECG.
- Please get a lipid profile and liver function test done after 30 days.

Diet and activity advice:
- Eat a low-salt, low-fat diet.
- Walk short distances on level ground and increase slowly.
- Do not smoke.
- Avoid strenuous exercise until reviewed.

Warning signs - return to the hospital if you have:
- Chest pain not relieved by rest.
- Breathlessness or cold sweats.
- Fainting.
- Black stools or unusual bleeding.
